

Backtrack Dairies

Week ending 21st February 2018

Backtrack Dairies

Two farming systems. One Kinsey-Albrecht (Whakapono) and one conventional (Waiora). Both farms have a stocking rate of 3.3 cows/ha at peak.

Week Ending	14/02/17		12/02/18	
Backtrack Dairies	Whakapono	Waiora	Whakapono	Waiora

Cow Condition

Cows were assessed at the start of December. Average condition is has slightly improved on Whakapono to 4.4 and remained the same on Waiora at 4.4. 6% of the herd on Whakapono was below CS 4.0 and there was 2% below CS 4.0 on Waiora. So for both farms an improvement in the bottom end. Both farms tracking along well.

Herd Test Results

Farm	No. of herds	Herd Size	Milk (L)	Milkfat (%)	Milkfat (kg)	Protein (%)	Protein (kg)	Milk Solids (kg)
Whakapono		446	21.3	4.80	1.02	4.19	0.89	1.91
Waiora		586	21.2	5.04	1.07	4.21	0.89	1.96
Canterbury	35	677	20.9	4.59	0.96	3.86	0.81	1.77

Results are from the 11th and 12th of January.

Management Summary

- Rotation length at present is at 20-22 days.
- Irrigation continues to keep up with dry period.
- Irrigation for k-lines and pivots as per moisture meter.
- 135mm of rain this week. Very wet.
- Maintenance fertiliser being put on. Pasturemag 5K on Waiora at a rate of 401kg/ha. This includes 1kg/ha of selenium. Whakapono has put on annual fertiliser with nitrogen.
- The plan for fertiliser plan for this season is to have both farms put on no more than 100kg/ha of N for the season.
- Waiora is now going to exceed this as the first round of fertiliser has been put on with a different product than what was initially planned. Interestingly it did not lift the cover to above expected levels.
- To date the spend for Waiora has been \$90,377.30 = \$430/ha. There will also be more maintenance fertiliser go on in Autumn as we didn't want to put so much K on in one hit.
- And on Whakapono the spend has been \$80,840.51 = \$521.55/ha.
- We have been pre-mowing paddocks to keep on top of pasture quality. All of Waiora has been mown and nearly all of Whakapono apart from 2 paddocks has been mown. Ironically the silage paddocks need to be done again.
- We have oversown all the paddocks that we calved on – with winter active ryegrass and plantain.
- Only 20 odd bulls and Hereford calves left on farm.
- Herd test done – see results table above.
- Had first scan for mating – Waiora 677 scanned – early 444 late 135 total to recheck 98 – 14.5% to recheck. Whakapono 516 scanned – early 347 late 108 total to recheck 61 – 12% to recheck.
-
