## **Backtrack Dairies**

Week ending 8<sup>tht</sup> November 2017

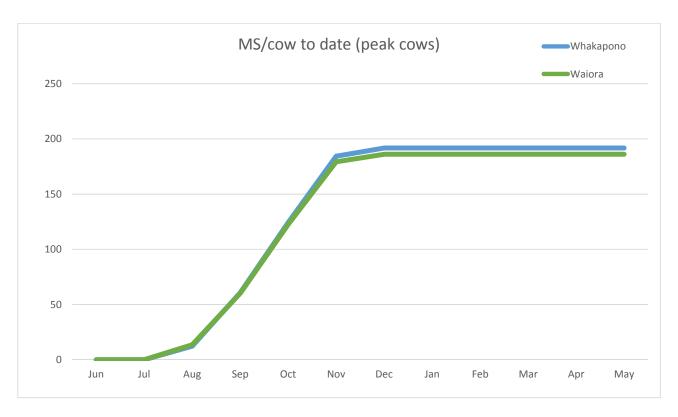

## **Backtrack Dairies**

Two farming systems. One Kinsey-Albrecht (Whakapono) and one conventional (Waiora). Both farms have a stocking rate of 3.3 cows/ha at peak.

Week Ending	1/11/	17	8/11/17		
Backtrack Dairies	Whakapono	Waiora	Whakapono	Waiora	
Farm grazing ha	155	210	155	210	
Peak Cows	523	697	523	697	
Stocking Rate (cows in milk/ha)	3.4	3.2	3.4	3.3

# **Production**

# Mating

Timeframe of Mating	Dates
Planned Start of Mating	29 <sup>th</sup> October
Metri-checking & PG 1	22 <sup>nd</sup> November
PG 2	1 <sup>st</sup> December
Change to short gestation	7 <sup>th</sup> December
hereford	
Al Finished	16 <sup>th</sup> December
Bulls entered herd	16 <sup>th</sup> December
Bulls removed from herd	7 <sup>th</sup> January
Pregnancy Scanning 1	1 <sup>st</sup> February
Pregnancy Scanning 2	1 <sup>st</sup> March

The plan is to use kiwi cross for most cows and friesian straws over obvious jersey cows. The above dates are when everything is planned to happen. These dates will get updated as we get to them.

## **Animal Health**

	Whakapono	Waiora		
No of Mastitis Cows	1	2		
No of Lame Cows	0	1		
Sick Herd %	0.5	1.0		

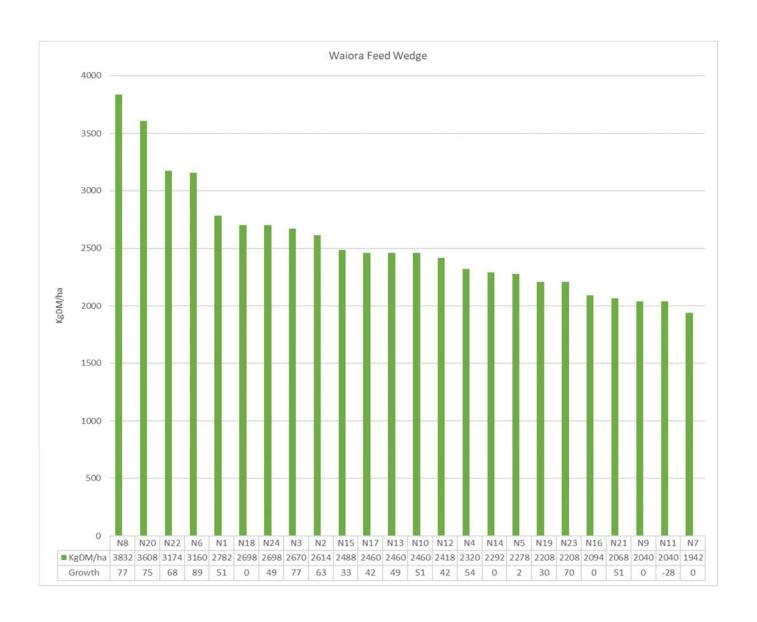

#### **Pastures**

# Pasture Quality for this week:

	Whakapono	Waiora
DM%	19	20
Ryegrass (%DM)	85	88
Clover (%DM)	15	10
Weeds (%DM)	0	1
Herbs (%DM)	0	1

# Feed Wedges – 6<sup>th</sup> November

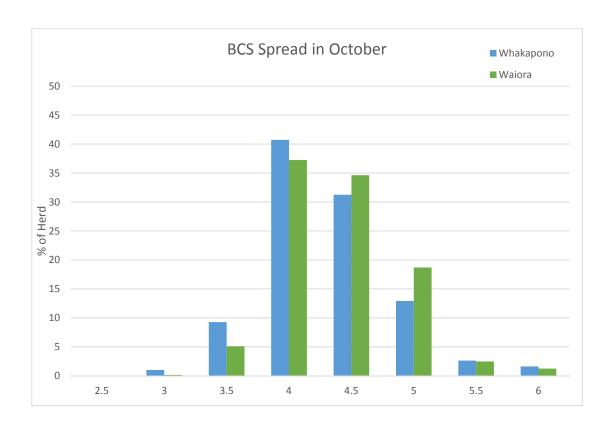

# **Fertiliser Applied**

### Whakapono - Healthy Soils

## **Cow Condition**

Cows were assessed at the start of October. Average condition is 4.3 on Whakapono and 4.4 on Waiora. 10% of the herd on Whakapono was below CS 4.0 and there was 5% below CS 4.0 on Waiora.

#### **Herd Test Results**

Farm	No. of herds	Herd Size	Milk (L)	Milkfat (%)	Milkfat (kg)	Protein (%)	Protein (kg)	Milk Solids (kg)
Whakapono		438	27.6	4.25	1.17	3.92	1.08	2.25
Waiora		570	27.1	4.39	1.19	3.86	1.05	2.24
Canterbury	157	659	26.4	4.41	1.16	3.72	.98	2.15

Results are from the 9<sup>th</sup> and 10<sup>th</sup> of October.

## **Management Summary**

- Rotation length at present is 24 to 26 days.
- 3 paddocks have been locked up on both sides for silage.
- Irrigation started a small amount for 1 round then stopped. Currently no measurements for Waiora but we are working on this.
- Irrigation K-lines and pivots as per moisture meter.
- Maintenance fertiliser is being put on. Pasture mag 5kg on Waiora at a rate of 401kg/ha. This includes 1kg/ha of selenium. Whakapono has put on annual fertiliser with nitrogen.
- The plan for fertiliser this season is to have both farms put on no more than 100kg/ha of N for the season.
- To date 8/11/17 the spend for fertiliser on Waiora has been \$79,945.
- And on Whakapono the spend has been \$64,844.
- We have been pre-mowing paddocks to keep on top of pasture quality.
- We have oversown all the paddocks that we calved on with winter active ryegrass and plantain.
- Sprayed out kellies on N22 and N24 didn't want to use round up so used grandstar instead, which means you need to leave it for 2 weeks if you want to plant with herbs.
- Calf milk is being taken from the vat on both sides 6600L for the week on Whakapono and 7000L for the week on Waiora.
- Calves still on farm the first 80 left the farm at 85kg or more. Calves go to the 2 graziers on a random basis as they come up to weight, but come back to their home farms at calving.
- Herd test done in late October see results table above. Another one due to be done in December?
