Australasian Dairy Science Symposium 2010

Lincoln University, DairyNZ and Dairy Australia are pleased to announce the 4th Australasian Dairy Science Symposium and extend an invitation to you to explore the theme ...

Meeting the challenges for pasture-based dairying

www.lincoln.ac.nz/dairysymposium

Venue: Lincoln University,
Christchurch, New Zealand

Dates: Tues 31 August to
Thurs 2 September 2010

Sessions will focus on:

Environmentally sustainable dairy farming

Herd fertility and welfare

Forage production and animal response

Dairy production systems

The Symposium Organising Committee is planning an exciting programme which will bring leading researchers from New Zealand and Australia together to focus specifically on scientific knowledge underpinning sustainable pasture-based dairy production.

Who should attend?

The programme will appeal to all those involved in dairy research on both sides of the Tasman. It should also appeal to those involved as professionals servicing the dairy industry as advisers, consultants or educators.

Call for abstracts

Is now open with submissions closing **1 March 2010**.

Accepted papers will be published in a pre-printed proceedings.

For more information on topics please go to the Symposium website:
