SOUTH ISLAND DAIRYING DEVELOPMENT CENTRE

What is SIDDC?

SIDDC is a partnership between Lincoln University, Dexcel Ltd, Ravensdown, Crop & Food Research, South Island Dairy Event [SIDE] farmer network, and Livestock Improvement.

SIDDC was established to help the South Island dairy industry achieve continuous improvements in efficiency and productivity, to promote research and innovation, and to ensure the industry operates sustainably.

Come along and discuss the issues

What are the challenges for dairying on the international stage?

What is the value of dairying to Canterbury?

What are the challenges for those dairying in Canterbury?

What is happening in soil and environmental research?

What other dairy related research is being undertaken around Lincoln?

What should the future focus be for dairy related research?

SIDDC is a partnership between:
